Hello, My name is Ekin Akyıldırım and I am pleased to introduce myself to you. My interest and passion for software and electronics are fundamental elements that have shaped my career. I am a second-year student in the Electrical and Electronics Engineering department at Hacettepe University. Throughout my university education, I strive to improve myself in the fields of electronics and software.

Firstly, I have knowledge about software engineering principles and continue to learn related topics. In the field of electronics, I have acquired knowledge about circuit design and basic electronic components. I have worked on circuit design and assembly in university laboratories. Understanding the operation of electronic devices and conducting experiments on them excites me.

Looking ahead, I want to build a career in the software and electronics fields. During my university education, I aim to support my theoretical knowledge with practical experiences to achieve this goal. At the same time, I explore opportunities to keep up with new technologies and continuously improve myself. As a student who values self-motivation and disciplined work, I will seize every opportunity to further advance myself in the fields of software and electronics. I am eagerly looking forward to actively working and contributing to your team.

Education and Qualifications

High School 2016 - 2020
60.Yıl Anadolu Lisesi, Güzelbahçe/İzmir

Bachelor's Degree 2020 - Present
Hacettepe University, Ankara
Electrical Electronics Engineering Second Year Student
